ASK ABOUT OUR

CP-711

TRADE IN PROGRAM

TOG COMBO PACK

TOG Industrial Features

- Compaction force of a stationary compactor that fits in areas with limited available space. CP-711-FL4 or FL6 requires only an 8' x 12' operation area.
- Container Sizes in 4, 6 and 8 cubic yard capacity front load or rear load styles
- Spill lip on the container catches waste that can fall from the compaction chamber when the container is removed. The result is a cleaner waste handling area.
- Front load containers are equipped with an easy latching system for attaching or removing the container to the compactor and an automatic lid locking/unlocking system when emptying the container.
- Rear load containers are attached to the compactor with ratchet binders and the lid is fastened with manual drop hooks.
- Meets or Exceeds Current ANSI Z245 Safety Standards
